Subject: In the Matter of LightSquared Subsidiary LLC Request for Modification of its  
Authority for an Ancillary Terrestrial Component; SAT-MOD-20101118-00239

Dear Ms. Dortch:

We support LightSquared's efforts to build a 4G-LTE nationwide broadband wireless network. Given our nation's need for expanded broadband capacity and access, this privately funded project seems worthy of support.

Our members live in a very rural area in Michigan. Having expanded access to broadband wireless network will be extremely advantageous to the Hannahville Indian Community.

LightSquared will offer service through both its satellite network and its ground based cell towers. Users will be less likely to see the dreaded "searching for signal" on their mobile devices, even in remote areas currently underserved by existing wireless providers. And our emergency service providers will also have a communications network that they can rely on no matter where and in what conditions the crisis is taking place.

LightSquared will be a wholesale provider, enabling sorely needed competition like never before in the wireless market. Consumers will benefit the most because LightSquared will ease bandwidth limitations, allow for the introduction of new devices, and facilitate more competitors to enter the wireless market, lowering prices.

Please consider the benefits LightSquared can offer the country as a whole and to our state in particular, and please do everything possible to bring this exciting new nationwide wireless network to the country as quickly as possible.

Thank you for your attention to this matter.

Sincerely,

  
Kenneth Meshigaud  
Hannahville Indian Community  
Tribal Council Chairperson
